Geographic Research Area

GEOGRAPHY DIVISION

MISSION

The Geography Division is responsible for the production of geographic intelligence in support of the CIA and other components of the intelligence community, as required.

FUNCTIONS

The Geography Division shall:

1. Formulate, recommend, and carry out regional and systematic research on the geographic characteristics of areas of intelligence concern.
2. Fulfill intelligence requirements of the CIA and/or other departments and agencies of the government for special geographic studies in the fields of evasion and escape, unconventional warfare, targeting, territorial problems, and map appraisal.
3. Provide continuing intelligence on developments in Sino-Soviet Bloc geodesy, gravimetry, and cartography related to the scope, programs, and capabilities of Sino-Soviet Bloc mapping.
4. Report and advise on trends and events of geographic intelligence significance.
5. Chair meetings of the NIS Chapter IX Subcommittee, and coordinate and review contributions by the intelligence community to Chapter IX, Section 19 of Chapter I, and the Annals of the National Intelligence Survey.
